The ARRL Repeater Directory

**Edited by
Jay Mabey, NU0X**

**The American Radio Relay League
Newington, CT 06111**

PURPOSE

The purpose of the ARRL *Repeater Directory* is to provide:

1) A reference manual of repeater locations, frequencies and other pertinent data for the United States, Canada and, where available, the Caribbean, Central and South America, Pacific Islands under US jurisdiction and portions of Europe.

2) Information necessary to contact frequency coordinators and regional members of the ARRL Spectrum Management Committee (SMC), and the ARRL Digital and Future Systems Committees

3) Listings of packet radio systems. Please note that presently, packet listings are accepted only from regional Frequency Coordinators or packet coordinators where such exist.

4) Listings of worldwide propagation beacons.

5) A national listing of ARRL Special Service Clubs (SSCs), their meeting times, locations and contact persons.

Dual Band Mobile Ant

Mobile Antenna for 144/440 MHz

144/440 MHz dual band *magnet mount* mobile antenna gives you outstanding $\frac{1}{4}$ wave performance on 144 MHz plus high gain on 440 MHz -- for really long QSOs.

It's only 19 inches tall so you can park in your garage without knocking over your antenna. Low SWR, 15 feet of coax, extra powerful magnet, one year *unconditional* guarantee. Includes BNC adapter so you can use it with your handheld.

MFJ-1724B

\$14⁹⁵

MFJ *mini* Speaker-Mics

Outstanding audio in a tiny package! For Kenwood, Icom, Yaesu, Alinco handhelds

MFJ *miniature* Speaker-Mics measure just 2"x1 $\frac{1}{4}$ "x $\frac{1}{4}$ ". Lapel clip swivels for easy positioning. Has earphone jack, lightweight retractable cord, transmit LED.

One year *unconditional* guarantee. Order MFJ-285 or MFJ-285L for Icom, Yaesu, Alinco; MFJ 287 or MFJ-287L for Kenwood; MFJ-283 for dual connector Alinco.

FOREWORD

This 23rd edition of the ARRL Repeater Directory has undergone a substantial change. We have "chapterized" the book, making it easier than ever to locate the reference material and listings.

The purpose of the Repeater Directory is to provide concise, accurate and up-to-the-minute information for you. To this end, the final editorial process was completed just two weeks before the book left for the printer. All coordinators had a chance to approve final proofs prior to publication.

The ARRL Spectrum Committee is in place to keep abreast of the ever-changing requirements and interest above 30 MHz. These committee members are listed for your convenience as are ARRL Officers, Digital and Future Systems committee members, Coordination Council officers and regional frequency coordinators.

This edition contains over 20,000 listings for FM voice repeaters, ATV systems, limited packet radio listings and propagation beacons. This data is submitted annually by regional frequency coordinators who volunteer many hours of their time to provide you, the user, with the listings contained in this book. They have our sincere thanks and appreciation for their hours of effort in the annual preparation of this publication. Many coordinators throughout the US and Canada are using the National Repeater Data Base (NRDB) —a national BBS available only to frequency coordinators for exchanging coordination information and housed at ARRL HQ.

Thank you for choosing the ARRL *Repeater Directory* and enjoy your excursion into the world of FM communications.

ANNUAL UPDATE INFORMATION

This edition of the *Repeater Directory* has been revised with the exception of the following Areas/Frequencies/States:

- 1) Southern Nevada
- 2) NESMC: 52, 220, ATV
- 3) TSARC: 902
- 4) UNYREPCO Area

If you have questions or concerns about these areas, please contact the Regional Frequency Coordinator. Annual updates and reminders are to be submitted to ARRL HQ by the Regional or State Frequency Coordinator by December for inclusion in the next edition of the *Repeater Directory*.

here is the next generation Repeater

MARK 4CR The **only** repeaters and controllers with REAL SPEECH!

No other repeaters or controllers match Mark 4 in capability and features. That's why Mark 4 is the performance leader at amateur and commercial repeater sites around the world. Only Mark 4 gives you Message Master™ real speech • voice readout of received signal strength, deviation, and frequency error • 4-channel receiver voting • clock time announcements and function control • 7-helical filter receiver • extensive phone patch functions. Unlike others, Mark 4 even includes power supply and a handsome cabinet.

2 Meters
220
and 440

Create messages just by talking. Speak any phrases or words in any languages or dialect and *your own voice* is stored instantly in solid-state memory. Perfect for emergency warnings, club news bulletins, and DX alerts. Create unique ID and tail messages, and the ultimate in a real speech user mailbox — only with a Mark 4.

Call or write for specifications on the repeater, controller, and receiver winners.

CHAPTER 1 —

GENERAL INFORMATION SECTION

This chapter will address repeater operating practices, give you a few user notes, provide information on special features some repeaters utilize, cover interference issues and discuss what to do if your repeater experiences jamming. A section listing CTCSS tone frequencies is also included for your information.

Repeater Operating Practices

The following suggestions will assist you in operating a repeater “like you’ve been doing it for years.”

1) Monitor the repeater to become familiar with any peculiarities in its operation.

2) To initiate a contact simply indicate that you are on frequency. Various geographical areas have different practices on making yourself known, but, generally, “This is NUØX monitoring” will suffice. Please don’t “ker-chunk” (key up without identifying yourself) the repeater “just to see if it’s working.”

3) Identify legally; you must identify at the end of a transmission or series of transmissions and at least once each 10 minutes during the communication.

4) Pause between transmissions. This allows other hams to use the repeater (someone may have an emergency). On most repeaters a pause is necessary to reset the timer.

5) Keep transmissions short and thoughtful. Your

“monologue” may prevent someone with an emergency from using the repeater. If you talk long enough, you may actually time out the repeater. Your transmissions are being heard by many listeners including nonhams with “public service band” monitors and scanners; don’t give a bad impression of our service.

6) Use simplex whenever possible. If you can complete your QSO on a direct frequency, there is no need to tie up the repeater and prevent others from using it.

7) Use the minimum amount of power necessary to maintain communications. This FCC regulation {(97.313(a))} minimizes the possibility of accessing distant repeaters on the same frequency.

8) Don’t break into a contact unless you have something to add. Interrupting is no more polite on the air than it is in person.

9) Repeaters are intended primarily to facilitate mobile operation. During the commuter rush hours, base stations should relinquish the repeater to mobile stations; some repeater groups have rules that specifically address this practice.

10) Many repeaters are equipped with autopatch facilities which, when properly accessed, connect the repeater to the telephone system to provide a public service. The FCC has liberalized Part 97.113 regarding business communication by amateurs. Amateur operators may not accept compensation for the use of their radios, however, under certain conditions the radio/autopatch can be utilized to make appointments and order items. This, though, is a decision that is made by the local repeater owner so check with yours before making such calls. Autopatch facilities should never be used to avoid a toll call or where regular telephone service

is available. Remember, autopatch privileges that are abused may be rescinded. For further details on business communication rules, please consult the *FCC Rule Book* or *QST* magazine.

11) All repeaters are assembled and maintained at considerable expense and inconvenience. Usually an individual or group is responsible, and those who are regular users of a repeater should support the efforts of keeping the repeater on the air.

USER INFORMATION

Except where noted, repeaters are listed according to their Geographic Area (metropolitan area or county). There are, however, some state Frequency Coordinators who prefer to list their systems alphabetically by location. Packet and special mode repeaters are not (usually) broken down by Geographic Area.

This directory lists private (closed) repeater systems as well as open systems. Many private systems, including repeaters, remote bases, control and link channels are in properly coordinated operation on authorized frequencies, but are not included in this directory. This is especially common on the 440-MHz band, commonly utilized for linking and/or remote control systems. Please consult your Frequency Coordinator for their recommendations for operating frequencies on new repeaters, remote bases or control links.

With an increase in the number of reports of repeater-to-repeater interference, the FCC is placing more emphasis on repeaters being coordinated. Repeater coordination is an example of voluntary self-regulation within the Amateur Service. Non-coordinated repeater operation may imply non-conformance with locally recognized band plans (eg, an unusual frequency split) or simply that the repeater trustee has not yet applied for, or received "official" recognition from the Frequency Coordinator. Known non-coordinated repeaters are indicated in this directory with a pound sign (#) preceding the city of location. This symbol does not indicate anything about the relative merit of any particular repeater.

PLEASE NOTE: It is the responsibility of the TRUSTEE to provide the Frequency Coordinator with annual updates for inclusion in *The ARRL Repeater Directory*. Most coordination organizations have their own criteria for annual updates.

REPEATER-TO-REPEATER INTERFERENCE

In an effort to resolve repeater-to-repeater interference complaints, the FCC has offered the following definition of "Repeater Operation." Where an Amateur Radio station in repeater or auxiliary operation causes harmful interference to the repeater or auxiliary operation of another amateur radio station, the two are equally and fully responsible for resolving the interference unless one station's operation is coordinated and the other's is not. In that case, the station engaged in the non-coordinated operation has primary responsibility to resolve the interference.

REPEATER JAMMERS AND THE LOCAL INTERFERENCE COMMITTEE

Interference on VHF or UHF repeaters is primarily a local problem requiring local resolution. This kind of problem varies from non-existent in some parts of the country to extremely serious in others. The Amateur Auxiliary mechanism for dealing with any local amateur-to-amateur interference (primarily on VHF) is the local interference committee. The philosophy of the committee approach to solving this type of problem was provided in 1980 by the ARRL Interference Task Force. Many repeater groups have already successfully established local interference committees, some employing very sophisticated methods. The committee approach to solving this type of problem and Public Law 97.259 have proven most effective.

The Amateur Auxiliary incorporates this program of local interference committees into its comprehensive program of dealing with all types of amateur variations with the regulations. Since the ARRL Field Organization is the focus of Amateur Auxiliary involvement as recognized by agreement with the FCC, the local interference committee now comes within the purview of the Section Manager's overall Amateur Auxiliary program. The local interference committee gains official standing through the Section Manager. It is, in effect, a "group appointment" of the Section Manager, for specific authorization to deal with local problems of amateur-to-amateur interference. Thus the local interference committee plays a crucially important role in the make-up of the Amateur Auxiliary.

For more information on local interference committees, Amateur Auxiliary and the ARRL Field Organization, contact your ARRL Section Manager, or the Field Services Department at ARRL HQ.

NOTES AND SPECIAL FEATURES

What follows is a discussion of some of the specialized features used in repeater listings (NOTES) in the directory.

- LOCATION** — The city/town where the repeater is located a pound sign (#) indicates the repeater is uncoordinated by the coordination council.
- OUTPUT** — The output frequency in megahertz.
- INPUT** — The frequency offset (difference between input and output frequencies). Either a (+) or (-). In cases where a frequency is printed in the input field indicates a "non-standard" offset.

Standard offsets by band:

- 29 MHz - 100 kHz
- 52 MHz - Various
- 144 MHz - 600 kHz
- 222 MHz - 1.6 MHz
- 440 MHz - .5 MHz
- 902 MHz - 12 MHz
- 1240 MHz - 12 MHz

- CALL** — The call sign of the repeater.
- NOTES** — How the repeater may be accessed and other specialized features are indicated by the following abbreviations:
- o** - Open (usually carrier-operated)
 - bi/bl** - Bi-lingual
 - c** - Closed, private system
 - LiTZ** - Long-Tone Zero—used to alert users to an emergency in some areas
 - t** - Tone-access (CTCSS Tone)
required to access Standard EIA frequency codes are listed later in this chapter. (The actual CTCSS frequency is published if known.)
 - tt** - Touch-Tone (R) access to specialized repeater functions.
 - RB** - Remote Base
 - SNP** - Shared Non-Protected Pair. In the areas of Western Washington, British Columbia and Oregon there are repeater frequencies listed as SNP. SNP frequencies are intended to provide spectrum for experimental repeaters, emergency/search and rescue operations,

portable public service systems and to act as a holding place for repeaters awaiting coordination. Users of SNP frequencies do so under the following guidelines:

- 1) The frequencies are shared by all users.
- 2) Operators receive no protection from other co-channel users.
- 3) All systems use CTCSS or other approved method of limited access.
- 4) The Frequency Coordinator shall coordinate the CTCSS tones.

SPECIALIZED FEATURES (NOTES continued):

a	- Autopatch
(ca)	- Closed autopatch
DS	- Dual Squelch
e	- Emergency power
e-sun	- Solar powered
e-wind	- Wind powered
l	- Linked/Cross-band repeater
p	- Portable system
pkt	- Data exchange capability
R/r	- RACES affiliated
A	- ARES affiliated
x	- Wide area coverage
y	- RTTY/ASCII
z	- Direct access to law enforcement (usually 911)
Wx	- Weather net
Exp	- Experimental

SPECIALIZED PACKET FEATURES:

d	- Digipeater
g	- Gateway
k	- Kantronics KA-Node
m	- Message storage (BBS system)
n	- Network (high level)

Note: In packet systems the "alias" is listed in the notes field in capital letters. There are additional specialized packet features listed, please contact the local coordinator for further information (coordinators are listed in Chapter 3).

SPONSOR — The sponsor of the repeater. A (+) sign indicates the listed call plus additional calls, sponsor the repeater.

CAT-300 Repeater Controller

Attention Repeater Owners

Finally a repeater controller with a TI voice synthesizer and full feature autopatch incredibly priced at \$299.00.

Features Include:

- ✓ Voice Synthesizer
- ✓ Twelve Voice Messages
- ✓ Two Voice Identifiers
- ✓ Full Feature Autopatch
- ✓ User Speed Dials
- ✓ DTMF Key Pad Test
- ✓ DTMF Repeater Access
- ✓ (56) Control Functions
- ✓ Remote Control Switches
- ✓ DVR Controller Ready *
- ✓ (412) Word Vocabulary
- ✓ Female Voice & Sound Effects
- ✓ CW Identifier
- ✓ Reverse Autopatch
- ✓ Emergency Speed Dials
- ✓ Programmable Courtesy Tones
- ✓ DTMF Repeater Muting
- ✓ Programmable Codes and Timers
- ✓ Hardware Logic Inputs

* (Requires MF-1000 Serial Interface Card \$59.00)

Write or Call for a brochure describing the CAT-300 Controller, including schematic, voice word list, and control functions.

CAT-300 Controller Board \$299.00 Wired and Tested

(305) 978-6171

CTCSS (PL) TONE FREQUENCIES

The purpose of CTCSS (PL)TM is to reduce co-channel interference during band openings. CTCSS (PL)TM equipped repeaters would respond only to signals having the CTCSS tone required for that repeater. These repeaters would not respond to weak distant signals on their inputs and correspondingly not transmit and repeat to add to the congestion.

The standard Electronic Industries Association (EIA) frequency codes, in hertz, with their Motorola alphanumeric designators are as follows:

67.0 - XZ	97.4 - ZB	141.3 - 4A	206.5 - 8Z
69.3 - WZ	100.0 - 1Z	146.2 - 4B	210.7 - M2
71.9 - XA	103.5 - 1A	151.4 - 5Z	218.1 - M3
74.4 - WA	107.2 - 1B	156.7 - 5A	225.7 - M4
77.0 - XB	110.9 - 2Z	162.2 - 5B	229.1 - 9Z
79.7 - WB	114.8 - 2A	167.9 - 6Z	233.6 - M5
82.5 - YZ	118.8 - 2B	173.8 - 6A	241.8 - M6
85.4 - YA	123.0 - 3Z	179.9 - 6B	250.3 - M7
88.5 - YB	127.3 - 3A	186.2 - 7Z	254.1 - 0Z
91.5 - ZZ	131.8 - 3B	192.8 - 7A	
94.8 - ZA	136.5 - 4Z	203.5 - M1	

During 1980 the ARRL Board of Directors adopted the 10-meter CTCSS (PL)TM tone-controlled squelch frequencies listed below for voluntary incorporation into 10-meter repeater systems to provide a uniform national system.

Call Area	Tone 1	Tone 2
W1	131.8 - 3B	91.5 - ZZ
W2	136.5 - 4Z	94.8 - ZA
W3	141.3 - 4A	97.4 - ZB
W4	146.2 - 4B	100.0 - 1Z
W5	151.4 - 5Z	103.5 - 1A
W6	156.7 - 5A	107.2 - 1B
W7	162.2 - 5B	110.9 - 2Z
W8	167.9 - 6Z	114.8 - 2A
W9	173.8 - 6A	118.8 - 2B
W0	179.9 - 6B	123.0 - 3Z
VE	127.3 - 3A	88.5 - YB

Communications Specialists, Inc. manufactures CTCSS encoders and decoders used in repeater applications, as well as other signalling devices. In repeater use, a decoder is installed in the repeater receiver. An encoder programmed to the same tone is then required in the radios accessing the repeater, eliminating intermod or other unwanted access to the machine. The tone frequencies in the decoder and encoders can be quickly and easily programmed by the radio operator. See below for the tone unit that best fits your needs, or call the factory for a complete catalog.

(A) SS-32P DIP Switch Programmable CTCSS Encoder
Size: .9''x1.3''x.4'' \$28.95

(B) SS-32SMP Micro-Miniature CTCSS Encoder
Size: .53''x1.0''x.16'' \$27.95

(C) SS-12A Twelve Tone CTCSS Encoder
Rotary dial selectable. Size: 1.3''x.9''x.73'' \$39.95

(D) TE-64 Self-contained Encoder with Rotary Switch
Size: 5.25''x3.3''x1.7'' \$79.95 (add \$50 for LED display)

(E) TS-32P Programmable CTCSS Encoder-Decoder
Provides squelch control for any FM transceiver.
Size: 1.25''x2.0''x.4'' \$57.95

(F) ID-8 Automatic Morse Station Identifier
Meets all FCC identification requirements. Fully field programmable via included keypad. Size: 1.85''x1.12''x0.35'' \$89.95

CHAPTER 2 —

ARRL AND ITU REGION 1 BAND PLANS

This chapter will address band plans. These exist only as “traffic control” devices, allowing the most efficient use of limited spectrum space and varied amateur interests. The band plans published herein were developed by the ARRL with input from the VRAC and VUAC (now replaced by the Spectrum Management Committee). Also discussed are the Line “A” restrictions and a map delineating repeater offsets is provided.

Although the FCC Rules set aside portions of some bands for specific modes, there’s still a need to further organize our space among user groups by “gentlemen agreements.” These agreements, or band plans, usually emerge by consensus of the band occupants, and are sanctioned by a national body like the ARRL. For further information on band planning see the Chapter 3 listings of the ARRL Spectrum Management Committee (SMC) members, or contact your Division Director (listed on page 8 of any *QST*).

VHF-UHF BAND PLANS

When considering frequencies for use in conjunction with a proposed repeater, be certain that both the input and output fall within subbands authorized for repeater use, and do not extend past the subband edges. FCC regulation 97.205(b) defines frequencies that are currently available for repeater use.

For example, a 2-meter repeater on exactly 145.50 MHz would be "out-of-band," as the deviation will put the signal outside of the authorized band segment.

Packet-radio operations under automatic control should be guided by Section 97.109(d) of the FCC Rules.

Regional Frequency Coordination

The ARRL supports regional frequency coordination efforts by amateur groups. Band plans published in *The ARRL Repeater Directory* are recommendations based on a consensus as to good amateur operating practice on a nationwide basis. In some cases, however, local conditions may dictate a variation from the national band plan. In these cases, the written determination of the regional frequency coordinating body shall prevail and be considered good amateur operating practice in that region.

28.000 - 29.700 MHz

28.000 - 28.070	CW
28.070 - 28.150	RTTY
28.150 - 28.190	CW
28.190 - 28.200	New beacon subband (*)
28.200 - 28.300	Old beacon subband (*)
28.300 - 29.300	Phone
29.300 - 29.510	Satellites
29.510 - 29.590	Repeater inputs
29.600	National FM Simplex Frequency
29.610 - 29.700	Repeater outputs

*User note: The FCC states in 97.203(d) that automatically controlled beacons may only operate on 28.20 - 28.30 MHz.

Repeater frequency pairs (input/output)

29.520/29.620	29.560/29.660
29.540/29.640	29.580/29.680

The following band plan for 6 meters was adopted by the ARRL Board of Directors at its July 1991 meeting.

50 - 54 MHz

50.0 - 50.1	CW, beacons
50.060 - 50.080	beacon subband
50.1 - 50.3	SSB, CW
50.10 - 50.125	DX window
50.125 - 50.197	SSB calling
50.3 - 50.6	all modes
50.6 - 50.8	nonvoice communications
50.62	digital (packet) calling
50.8 - 51.0	radio remote control (20-kHz channels)
NOTE: Activities above 51.10 MHz are set on 20-kHz-spaced "even channels"	
51.0 - 51.1	Pacific DX window
51.12 - 51.48	repeater inputs (19 channels)
51.12 - 51.18	digital repeater inputs
51.62 - 51.98	repeater outputs (19 channels)
51.62 - 51.68	digital repeater outputs
51.70	national packet simplex
52.0 - 52.48	repeater inputs (except as noted; 23 channels)
52.02, 52.04	FM simplex
52.2	TEST PAIR (input)
52.5 - 52.98	repeater output (except as noted; 23 channels)
52.525	primary FM simplex
52.54	secondary FM simplex
52.7	TEST PAIR (output)

53.0-53.48	repeater inputs (except as noted; 19 channels)
53.0	remote base FM simplex
53.02	simplex
53.1, 53.2, 53.3, 53.4	radio remote control
53.5-53.98	repeater outputs (except as noted; 19 channels)
53.5, 53.6	radio remote control
53.7, 53.8	
53.52-53.9	simplex

Notes: The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in July 1987.

National packet simplex frequency is: 51.70 MHz

Duplex pairs to consider for local coordination for uses such as repeaters and meteor scatter:

50.62-51.62	50.68-51.68	50.76-51.76
50.64-51.64	50.72-51.72	50.78-51.78
50.66-51.66	50.74-51.74	

Where duplex packet radio stations are to be co-existed with voice repeaters, use high-in, low-out to provide maximum frequency separation from low-in, high-out voice repeaters.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local frequency coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

144 - 148 MHz

144.00 - 144.05	EME (CW)
144.05 - 144.10	General CW and weak signals
144.10 - 144.20	EME and weak-signal SSB
144.200	National calling frequency
144.20 - 144.275	General SSB operation
144.275 - 144.300	Propagation beacons
144.30 - 144.50	New OSCAR subband
144.50 - 144.60	Linear translator inputs
144.60 - 144.90	FM repeater inputs
144.90 - 145.10	Weak signal and FM simplex (145.01,03,05,07,09 are widely used for packet radio)
145.10 - 145.20	Linear translator outputs
145.20 - 145.50	FM repeater outputs
145.50 - 145.80	Miscellaneous and experimental modes
145.80 - 146.00	OSCAR subband
146.01 - 146.37	Repeater inputs
146.40 - 146.58	Simplex
146.61 - 147.39	Repeater outputs
147.42 - 147.57	Simplex
147.60 - 147.99	Repeater inputs

NOTES: The frequency 146.40 MHz is used in some areas as a repeater input.

1) Automatic/unattended operations should be conducted on 145.01, 145.03, 145.05, 145.07 and 145.09 MHz.

a) 145.01 should be reserved for inter-LAN use.

b) Use of the remaining frequencies should be determined by local user groups.

2) Additional frequencies within the 2-meter band may be designated for packet radio use by local coordinators.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local Frequency Coordinator. The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Some areas use 146.40-146.60 and 147.40-147.60 MHz for either simplex or repeater inputs and outputs.

Suggested Simplex Frequencies:

(*)146.415 (*)146.475 146.535 146.595 147.465
 147.525 (*)146.430 (*)146.490 146.550 147.420
 147.480 147.540 (*)146.445 (*)146.505 146.565
 147.435 147.495 147.555 (*)146.460 (#)146.520
 146.580 147.450 147.510 147.570 147.585

(*) May also be a repeater Input/Output.

(#) National Simplex Frequency

Several states have chosen to realign the 146-148 MHz band, using 15 or 20 kHz spacing between channels. For further information on which states are currently utilizing which spacing structure see the Offset Map immediately following. The transition from 30-kHz spacing is taking place on a case-by-case basis as the need occurs.

NOTE: Please contact your local Frequency Coordinator for additional information on regional channel spacing. See Coordinator listing in Chapter 3.

ONE ANTENNA ALL VHF AND UHF BANDS!

CLP 5130-1
LP YAGI BEAM
50-1300 MHz
Continuous Coverage

One antenna does it all!

The CLP 5130-1 covers 50, 146, 222, 440, 902, 1296MHz Ham bands, VHF/UHF, 800MHz Public Service bands, Military, Aircraft bands, even complete Television and FM broadcast band coverage!

- Outstanding performance with high forward gain, VSWR below 2.0:1 over entire frequency range!
- Compact and lightweight, all aluminum design, multi purpose horizontal or vertical mounting.
- Extra strong, commercial grade construction withstands the worst weather for unsurpassed reliability.
- Can pass as a conventional TV antenna! Perfect for apartment dwellers, those with limited space or antenna restrictions.
- Attention Future Hams: High performance, continuous coverage scanner reception now, all band transmitting beam ant. when you get your ticket!
- Also available: Create model CLP5130-2 LP Yagi Beam with continuous 105-1300MHz coverage in a smaller size.

*If you could only have one antenna for complete VHF/
UHF coverage, this would be it!*

The following band plan for 222-225 MHz was adopted by the ARRL Board of Directors in July 1991.

222 - 225 MHz

222.00 - 222.15 (*)	Weak signal modes
222.00 - 222.025	EME
222.05 - 222.060	Propagation beacons
222.1	SSB & CW Calling
222.10 - 222.150	Weak signal CW & SSB
222.15 - 222.25	Local coordinator's option: weak signal, ACSB, repeater inputs and control
222.25 - 223.38	FM repeater inputs only
223.40 - 223.52	FM simplex
223.50	Simplex calling
223.52 - 223.223.64	Digital, packet
223.64 - 223.70	Links, control
223.71 - 223.85	Local coordinator's option; FM simplex, packet, repeater outputs
223.85 - 224.98	Repeater outputs only

Notes:

At press time, the FCC is considering the allocation of 219-220 MHz to the Amateur Service on a secondary basis. FCC action is anticipated sometime in the first part of 1994. Please watch *QST* for further announcements regarding this action.

(*) Effective February 1, 1994, the FCC created a subband at 222.00 to 222.15 where repeater operation is prohibited.

Candidate packet simplex channels shared with FM voice simplex. Check with your local Frequency Coordinator prior to use. Those channels are:

420 - 450 MHz

420.00 - 426.00	ATV repeater or simplex with 421.25 MHz video carrier, control links and experimental
426.00 - 432.00	ATV simplex with 427.25 MHz video carrier frequency
432.00 - 432.07	EME (Earth-Moon-Earth)
432.07 - 432.10	Weak signal CW
432.10	Calling frequency
432.10 - 432.30	Mixed-mode and weak-signal work
432.30 - 432.40	Propagation beacons
432.40 - 433.00	Mixed-mode and weak-signal work
433.00 - 435.00	Auxiliary/repeater links
435.00 - 438.00	Satellite only (internationally)
438.00 - 444.00	ATV repeater input with 439.250-MHz video carrier frequency and repeater links
442.00 - 445.00	Repeater inputs and outputs (local option)
445.00 - 447.00	Shared by auxiliary and control links, repeaters and simplex (local option)
446.00	National simplex frequency
447.00 - 450.00	Repeater inputs and outputs (local option)

The following packet-radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) 100-kHz bandwidth channels

430.05	430.35	430.65
430.15	430.45	430.85
430.25	430.55	430.95

2) 25-kHz bandwidth channels

431.025	441.000	441.050
440.975	441.025	441.075

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local Frequency Coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Line A Restrictions

The band is shared by amateurs with government Radio Location Services (RADAR); amateurs must not interfere with these priority government stations. As part of WARC-79 proceedings, the 420-430-MHz portion of the band was removed from the Amateur Radio Service north of Line "A" (see figure).

In a later action, the FCC allocated portions of the 421-430 MHz band to the Land Mobile Service within a 50-mile radii centered on Buffalo, Detroit and Cleveland. Amateur stations south of Line "A" in the vicinities of these cities may continue to operate in the 421-430 MHz spectrum as long as they do not cause interference to land mobile or government radio-location users. Additionally, 50-watt PEP output power limitations apply to certain amateurs operating within circles of designated military installations in the US. [See 97.313(f)(g)].

902 - 928 MHz

902.0 - 903.0	Weak signal
902.1	Calling frequency
903.0 - 906.0	Digital
903.1	Alternate calling frequency
906.0 - 909.0	FM repeater outputs
909.0 - 915.0	Amateur TV
915.0 - 918.0	Digital
918.0 - 921.0	FM repeater inputs
921.0 - 927.0	Amateur TV
927.0 - 928.0	FM simplex and links

Notes: Adopted by the ARRL Board of Directors in July, 1989. The following packet-radio frequency recommendations were adopted by the ARRL Board of Directors in January, 1988 as interim guidance. Two 3-MHz-bandwidth channels are recommended for 1.5 Mbit/s links. They are 903-906 MHz and 914-917 MHz with 10.7-MHz spacing.

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local Frequency Coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Canadian amateurs note: The Amateur Service will continue to have secondary status in the band 902-928 MHz throughout Canada, using any of the following emissions: N0N, A1A, A2A, A3A, A3E, C3F, F1A, F2A, F2B, F1C, F3E.

Before operating in this band, Canadian amateur licensees are required to consult with their DOC District Office to ensure interference will not be caused to other services operating in the area as per Section 45 of the General Radio Regulations Part II, given in TRC 25.

Government of Canada shipborne radiolocation service is permitted within 150 km of the East and West Coasts, Arctic Ocean, Hudson Bay, James Bay and up the St Lawrence River as far as Rimourski on precoordinated channels in the 902-928 MHz band.

Footnotes:

- 1) Extracts of FCC Rules & Regulations,
97.303(g)(1): No amateur station shall transmit from within the states of Colorado and Wyoming, bounded on the south by latitude 39 degrees North, on the north by latitude 42 degrees North, on the east by longitude 105 degrees West, and on the west by longitude 108 degrees West. (*)

(*) FOOTNOTE: Waived July 2, 1990 to permit amateurs in the restricted areas to transmit in the following segments: 902.0 - 902.4, 902.6 - 904.4, 904.7 - 925.3, 925.7 - 927.3 and 927.7 - 928-MHz.

This band is allocated on a secondary basis to the Amateur Radio Service subject to not causing harmful interference to, and not receiving protection from any interference due to the operation of, industrial, scientific and medical devices, automatic vehicle monitoring systems or government stations authorized in this band.

- 2) Coordinated frequency assignments are required.

3) ATV assignments should be made according to modulation type, eg, VSB-ATV, SSB-ATV or combinations. Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross-polarization and directional antennas.

4) Coordinated assignments at 100 kHz until allocations are filled, then assign 50 kHz until allocations are filled, before assigning 25-kHz channels.

5) Simplex services only; permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.

6) Voice and nonvoice operation.

7) Spread-spectrum requires FCC authorization.

8) Consult FCC (97.307) for allowable data rates and bandwidths.

The following band plan was adopted by the ARRL Board of Directors meeting in January 1985.

1240 - 1300 MHz

1240 - 1246	ATV #1
1246 - 1248	Narrow-bandwidth FM point-to-point links and digital, duplex with 1258-1260.
1248 - 1252	Digital Communications
1252 - 1258	ATV #2
1258 - 1260	Narrow-bandwidth FM point-to-point links and digital, duplexed with 1246-1252
1260 - 1270	Satellite uplinks, experimental simplex ATV
1270 - 1276	Repeater inputs, FM and linear, paired with 1282-1288. (239 pairs, every 25 kHz, eg, 1270.025, 050, etc)
1271/1283	Non-coordinated test pair
1276 - 1282	ATV #3
1282 - 1288	Repeater outputs paired with 1270-1276
1288 - 1294	Wide Band experimental, simplex ATV
1294 - 1295	Narrow band FM simplex, 25-kHz channels
1294.50	National FM simplex calling
1295 - 1297	Narrow band weak signal (no FM)
1295 - 1295.80	STV, FAX, ACSSB experimental
1295 - 1296	Reserved for EME, CW expansion
1296 - 1296.05	EME exclusive
1296.07 - 1296.08	CW beacons
1296.1	CW/SSB calling frequency

1296.40 - 1296.60 Crossband linear translator output
 1296.80 - 1297.00 Experimental beacons (exclusive)
 1297-1300 Digital communication

Notes: The following packet radio frequency recommendations were adopted by the ARRL Board of Directors in January 1988.

1) 2-MHz-bandwidth channels at:

1249.00 1251.00 1296.00

2) 100-kHz-bandwidth channels

1299.05 1299.45 1299.75

1299.15 1299.55 1299.85

1299.25 1299.65 1299.95

1299.35

3) 26-kHz-bandwidth channels

1294.025 : 1294.125

1294.050 1294.150

1294.075 1294.175

1294.100 National packet simplex calling

Packet Footnotes

Specific VHF/UHF channels recommended above may not be available in all areas of the US.

Prior to regular packet radio use of any VHF/UHF channel, it is advisable to check with the local Frequency Coordinator.

The decision as to how the available channels are to be used should be based on coordination between local packet radio users.

Footnotes

1) Deleted

2) Coordinated assignments required

3) ATV assignments should be made according to modulation type (for example, VSB-ATV,

SSB-ATV or combinations). Coordination of multiple users of a single channel in a local area can be achieved through isolation by means of cross polarization and directional antennas. DSB ATV may be used, but only when local and regional activity levels permit. The excess bandwidths from such users are secondary to the assigned services.

- 4) Coordinate assignments with 100-kHz channels, beginning at the lower end of the segment until allocations are filled, then assign 50-kHz channels until allocations are filled before assigning 25-kHz channels.
- 5) Wide bandwidth experimental users are secondary to the satellite service and may be displaced upon the installation of any new satellites. Users are EIRP-limited to the noise floor of the satellites in service and may suffer interference from satellite uplinks.
- 6) Simplex services only; permanent users shall not be coordinated in this segment. High altitude repeaters or other unattended fixed operations are not permitted.
- 7) Voice and nonvoice operations.
- 8) Consult 47 CFR 97.307 for allowable data rates and bandwidths.
- 9) Provide guard bands at the higher frequency end of segments, as required, to avoid interference to ATV.
- 10) 1274.0-1274.2 and 1286.0-1286.2 MHz are optionally reserved for contiguous Linear Translators supporting multiple narrow bandwidth users. These may also be duplexed with other noncoordinated band segments.

The following band plan was adopted by the ARRL Board of Directors in January 1991.

2300 - 2310 and 2390 - 2450 MHz

2300 - 2303	High-rate data
2303 - 2303.5	Packet radio
2303.5 - 2303.8	TTY packet
2303.8 - 2303.9	Packet, TTY, CW, EME
2303.9 - 2304.1	CW, EME
2304.1	Calling frequency
2304.1 - 2304.2	CW, EME, SSB
2304.2 - 2304.3	SSB, SSTV, FAX, Packet, AM, AMTOR
2304.3 - 2304.32	Propagation beacon network
2304.32 - 2304.4	General propagation beacons
2304.4 - 2304.5	SSB, SSTV, ACSSB, FAX, Packet, AM, AMTOR experimental
2304.5 - 2304.7	Crossband linear translator input
2304.7 - 2304.9	Crossband linear translator output
2304.9 - 2305	Experimental beacons
2305 - 2305.2	FM simplex (25-kHz spacing)
2305.2	FM simplex calling frequency
2305.2 - 2306	FM simplex (25-kHz spacing)
2306 - 2309	FM repeaters (25-kHz) input
2309 - 2310	Control and auxiliary links
2390 - 2396	Fast-scan TV
2396 - 2399	High-rate data
2399 - 2399.5	Packet
2399.5 - 2400	Control and auxiliary links
2400 - 2403	Satellite
2403 - 2408	Satellite high-rate data

2408 - 2410	Satellite
2410 - 2413	FM repeaters (25-kHz spacing) output
2413-2418	High-rate data
2418-2430	Fast-scan TV
2430-2433	Satellite
2433-2438	Satellite high-rate data
2438-2450	Wideband FM, FSTV, FMTV, SS experimental

3300 - 3500 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

3456.3 - 2356.4 Propagation beacons
5650 - 5925 MHz

The following beacon subband was adopted by the ARRL Board of Directors in July 1988.

5760.3 - 5760.4 Propagation beacons
10.000 - 10.500 GHz

The following subband recommendation was adopted by the ARRL Board of Directors in January 1987.

10.368 GHz Narrow-band calling frequency

The following beacon subband was adopted by the ARRL Board of Directors in Jul 1988.

10368.3 - 10368.4 Propagation beacons
10364.0 Calling frequency

ITU Region 1 (Europe and Africa)

144-146 MHz Band Plan

144 - 144.01	EME
144.05	CW calling, once contact has been established move off frequency
144.10	CW random meteor scatter
144.15	Upper limit CW exclusive
144.20	SSB random meteor scatter
144.30	SSB calling, once contact has been established move off frequency
144.40	SSB meteor scatter reference frequency
144.50	SSTV calling, upper limit CW/SSB exclusive
144.60	RTTY calling
144.675	Data transmission calling frequency
144.70	FAX calling
144.845 - 144.990	Beacon exclusive
145 - 145.175	Repeater inputs R0 to R7
145.2 - 145.575	Channelized FM simplex
145.5	FM calling frequency, once contact has been established move off frequency
145.6 - 145.775	Repeater outputs R0 to R7
145.8 - 146	Space communications, CW/SSB uplink only

Repeater channels (input/output)

R0 145.000/145.600

R1 145.025/145.625

R2	145.050/145.650
R3	145.075/146.675
R4	145.100/145.700
R5	145.125/145.725
R6	145.150/146.750
R7	145.175/145.775

Packet frequencies most widely used are:

144.650 144.675 432.675

Simplex channels

S10	145.25
S11	145.275
S12	145.30
S13	145.325
S14	145.35
S15	145.375
S16	145.40
S17	145.45
S18	145.45
S19	145.475
S20	145.50 - Most common simplex calling frequency, once contact has been established move off frequency
S21	145.525
S22	145.55
S23	145.575

UK repeaters require a 1750-Hz (± 25 -Hz) tone burst of about 200-ms duration to open therepeater. It is best to transmit this tone at the start of each transmission. Belgian repeaters require a 3-second tone burst. Swiss repeaters require an 1800-Hz tone burst.

Note: Several French repeaters are on nonstandard frequency pairs. Those pairs are:

144.725/146.325	144.825/145.425
144.750/145.350	144.850/145.450
144.800/145.400	144.875/145.475

CHAPTER 3 —

REPEATER LISTINGS - COMMITTEES and COORDINATORS

Within the confines of this chapter you will find a description of repeater listing procedures, how and why repeaters are registered, and listings of Regional Frequency Coordinators. Also included for your information is a list of the ARRL Spectrum Management Committee (SMC), other ARRL active committees and present ARRL Officers.

REPEATER LISTINGS

All repeater listings in *The Repeater Directory* are provided by regional and state Frequency Coordinators and are printed exactly as they are received. (Except for minor editorial changes to field length.) If you notice any errors or omissions, please immediately notify your Frequency Coordinator. Addresses are listed for your convenience in this chapter.

Listings provided by member states of the Mid-America Coordination Council, Inc., (MACC) are copyright 1994 and are published by permission.

Listings provided by the Southeastern Repeater Association, Inc., (SERA) are copyright 1994 and are published by permission.

Listings provided by the Alabama Repeater Council, Inc., (ARC) are copyright 1994 and are published by permission.

In exceptional cases, where organizations or coordinators are not known to exist, listings have been obtained by the best source available. Foreign listings for *The ARRL Repeater Directory* are

welcomed and those included in this edition were largely provided courtesy of the IARU Societies.

Repeater listings are accurate to the best of our ability; however, no guarantee of accuracy is made or implied. The listing of a repeater in *The ARRL Repeater Directory* does not imply that the listed repeater has any greater legal status than any other amateur station.

Special assistance for this edition was provided by Tom Hammond, NØSS.

REPEATER REGISTRATION

Repeater registration and updates are necessary in order to compile a current and accurate Repeater Directory. In some cases the changes only involve the addition or deletion of a specialized feature — in other cases it may involve a frequency or location change. Your Frequency Coordinator is in charge of seeing to it that this updated information is provided to *The ARRL Repeater Directory* in a timely manner for publication. Several repeater registration forms are provided at the end of this publication for your convenience.

Please note that all repeater registration is now carried out through Frequency Coordinators. ARRL HQ only takes information and updates for Beacon stations. In rare cases where a coordination body does not exist in your area, you may submit updates or changes (in writing) to ARRL HQ. Please, if doing so, document all pertinent information (old and new) on your repeater and mail it to:

Editor,
The ARRL Repeater Directory
225 Main Street
Newington, CT 06111

Frequency Coordinators

The ARRL is not a Frequency Coordinator, nor does the ARRL "certify" coordinators. Frequency Coordinators are volunteers normally appointed by a coordinating body. *The ARRL Repeater Directory* reports only the fact of coordination or non-coordination as instructed by the coordinating body. Publication in the Repeater Directory does not constitute nor imply endorsement or recognition of the authority of such coordinators, as coordinators derive their authority from the voluntary participation of the entire amateur community in the areas they serve.

In some cases the person or group listed only compiles the information for listings in *The ARRL Repeater Directory*. In other cases the listed individual or group offers guidance, but not coordination.

Frequency Coordinators keep extensive records of repeater input, output and control frequencies, including those not published in directories (at the owner's request). The coordinator will recommend frequencies for a proposed repeater in order to minimize interference with other repeaters and simplex operations. Therefore, anyone considering the installation of a repeater should check with the local Frequency Coordinator prior to such installation.

The following is a listing of groups or individuals for the United States and Canada who are active in frequency coordination and are acknowledged, by virtue of the recognition accorded them by the entire amateur community they serve, as the sole Frequency Coordinators in their respective jurisdictions. Listings appear in order of largest parent organizations (MACC, SERA, TVFS etc), followed by Canadian provinces and states

listed in alphabetical order. Packet radio coordinators, where they exist, are listed at the end of the alphabetical state listings.

PLEASE NOTE:

For updates and/or changes to your repeater system please notify your Frequency Coordinator in writing. The ARRL cannot accept updates or changes from individual owners/trustees. Only data forwarded to us by the Frequency Coordinator/organization for your region will be published.

Listing of Regional Frequency Coordination Organizations and State Coordinators:

MACC Officers:

President

Ken Enenbach, KC0WX
110 E 51st St #14
Kansas City, MO 64112

Vice-President

ARRL SPECTRUM MANAGEMENT COMMITTEE

The ARRL Board of Directors created the Spectrum Management Committee at its July 1993 meeting. The Committee shall:

- 1) Restrict its activities to frequencies above 30 MHz and shall not engage in bandplanning although it may be asked with examination and comment on such problems.
- 2) Examine and consider concerns of amateur operators with regard to mode, digital protocol, frequency utilization, impending technical improvement, applicable governmental regulations and activities, IARU actions and other matters referred to it by the ARRL Board of Directors.
- 3) When band-planning needs are identified, the Committee will recommend to the Board creation of an Ad-hoc committee to pursue and solve the problem.

Present members of the Spectrum Management Committee:

CHAPTER 4— REPEATER LINGO / NOVICE HINTS

This chapter covers a basic course in “repeater-speak” and explains many of the terms heard on your local repeater. The section on the Novice bands is very helpful as well. Read on and enjoy!

REPEATER LINGO:

Definitions of the words and phrases commonly used on repeaters:

Autopatch—A device that interfaces the repeater system with the telephone system to extend ham communication over the telephone communication network.

Breaker—A ham who interjects his call sign during a QSO in an attempt to get a chance to communicate over a repeater.

Channel—The pair of frequencies (input and output) a repeater operates on.

Closed Repeater—A repeater whose use is limited to certain individuals. These are completely legal under FCC Rules.

Control Operator—An individual ham designated to “control” the repeater, as required by FCC regulations.

COR—Carrier-Operated-Relay, a device that, upon sensing a received signal, turns on the repeater's transmitter to repeat the received signal.

Courtesy Tone—A short tone sounded after each repeater transmission to permit other stations to gain access to the repeater before the tone sounds.

Coverage—The geographical area in which the repeater may be used for communication.

CTCSS—Continuous Tone Coded Squelch System, a subaudible tone system which operates the squelch (COR) of a repeater when the corresponding subaudible tone is present on a transmitted signal. The squelch on a repeater that uses CTCSS will not activate if the improper CTCSS tone, or if no tone, is transmitted.

Crossband—Communication to another frequency band by means of a link interfaced with the repeater.

Desense—Degradation of receiver sensitivity caused by strong unwanted signals reaching the receiver front end.

Duplexer—A device that permits the use of one antenna for both transmitting and receiving with minimal degradation to either the incoming or outgoing signals.

Frequency Synthesis—A scheme of frequency generation in modern transceivers using digital techniques.

Full Quieting—Signal strength in excess of the amount required to mask ambient noise.

Hand-Held—A portable FM transceiver that is small enough to use and carry in one hand.

Input—The frequency the repeater receiver is tuned to: The frequency that a repeater user transmits on.

Intermod—Interference caused by spurious signals generated by intermodulation distortion in a receiver front end or transmitter power amplifier stage.

Key-Up—Turning on a repeater by transmitting on its input frequency.

LiTZ—Long Tone Zero (LiTZ) Alerting system. Send DTMF zero (0) for at least three seconds to request emergency/urgent assistance.

Machine—The complete repeater system.

Mag-Mount—A mobile antenna with a magnetic base that permits quick installation and removal from the motor vehicle.

Offset—The spacing between a repeater's input and output.

Omnidirectional—An antenna system that radiates equally in all directions.

Output—The frequency the repeater transmits on; the frequency that a repeater user receives on.

Picket-Fencing—Rapid flutter on a mobile signal as it travels past an obstruction.

Polarization—The plane an antenna system operates in; most repeaters are vertically polarized.

Reverse Autopatch—A device that interfaces the repeater with the telephone system and permits users of the phone system to call the repeater and converse with on-the-air repeater users.

Reverse Split—A split-channel repeater operating in the opposite direction of the standard 30-kHz repeaters.

RPT/R—Abbreviation used after repeater call signs to indicate that the call sign is being used for repeater operation.

Simplex—Communication on one frequency, not via a repeater

Splinter Frequency—2-meter repeater channel 15-kHz above or below the standard 30-kHz spaced channel.

Split Sites—The use of two locations for repeater operation (the receiver is at one site and the transmitter at another), and the two are linked by telephone or radio.

Squelch Tail—The noise burst that follows the short, unmodulated carrier following each repeater transmission.

Time-Out-Timer—A device that limits the length of a single repeater transmission (usually 3 minutes).

Tone Pad—A device that generates the standard telephone system tones used for controlling various repeater functions.

USER'S GUIDE TO THE NOVICE BANDS

Before using any repeater, new users may wish to refer to Chapter 1 for some additional guidelines on repeater operating practices.

New users of repeaters should be aware of their transmit frequency or offset. Transmitting on the wrong offset may interfere with other amateur operators or, more seriously, may be out of band and interfere with other radio services. If you have any questions regarding the operation of your equipment, your owners manual or more experienced operators should be able to assist you.

FM is only one of many modes available to Novices and Technicians. For further information on other modes of operation or license limitations, refer to the *FCC Rule Book*, one of the many helpful ARRL publications.

The 1.25-meter (222.00 - 225.00 MHz) Novice simplex and repeater frequencies can be found on the following pages entitled "A User's Guide" to the 1.25-Meter and 23-CM Novice Bands.

A User's Guide to the 1.25-Meter and 23-CM Novice Bands

222.00 - 225.00 MHz (1.25 Meters)

Effective February 1, 1994, the FCC made the entire 1.25-meter band available to Novice class operators. Repeaters are prohibited from a small subband (222.00 - 222.15) of this band. Novice class operators were not, however, authorized to be control operators or licensees of repeaters in the 1.25-meter band by this action.

Here's where to look for simplex FM voice activity in the 1.25-meter Novice subband. Frequencies are in MHz:

223.42	223.56	223.70	223.84
223.44	223.58	223.72	
223.46	223.60	223.74	
223.48	223.62	223.76	
223.50*	223.64	223.78	
223.52	223.66	223.80	
223.54	223.68	223.82	

* National Simplex Frequency

The Novice 23-cm band (1270-1295 MHz) contains many different types of uses. The Novice will find that many repeaters listed in the "1240 MHz and Above" section of this publication are on frequencies available to them.

The following graphic illustrates the 1270-1295 MHz Novice band plan:

29.5-29.7 MHz

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for the use of cross band repeaters. Cross band repeaters or duplexradios should:

- 1) Never be used to link to an established repeater system or to link two established repeaters together without the express approval of the repeater owners.
- 2) Be used for temporary, short duration activities only and never installed as a long term communication facility.
- 3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output on a

Location	Output	Input	Call	Notes	Sponsor
----------	--------	-------	------	-------	---------

unity gain antenna.

4) Utilize CTCSS decode and encode circuitry to minimize uninvited access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.

5) Be identified every 10 minutes in accordance with FCC rules.

6) Be disabled by its operator within 15 minutes of notification of interference or other problems.

7) Should be continually monitored by the operator to minimize interference.

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for the use of cross band repeaters. Cross band repeaters or duplexradios should:

- 1) Never be used to link to an established repeater system or to link established repeaters together without the express approval of the repeater owners.
- 2) Be used for temporary, short duration activities only and never installed as a long term communication facility.
- 3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output on unity gain antenna.
- 4) Utilize CTCSS decode and encode circuitry to minimize unwanted access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.
- 5) Be identified every 10 minutes in accordance with FCC rules.
- 6) Be disabled by its operator within 15 minutes of notification of interference or other problems.
- 7) Should be continually monitored by the operator to minimize interference.

COLORADO REPEATER ASSOCIATION

SUPPORT AMATEUR RADIO

COLORADO REPEATER ASSOCIATION
POST OFFICE BOX 621
PARKER, COLORADO 80134

The Colorado Repeater Association's (CRA) 700+ members welcome all amateurs to the state of Colorado. The CRA's ragchew repeaters are open to all hams. Please feel free to access and use the listed CRA frequencies.

Join our Information Net every Sunday at 9 AM for license exam info, The NewsLine Report, The Swap Net, a swapfest schedule and much more. CRA repeaters host various special interest nets weekday evenings covering AMSAT, ARES, EOSS, QRP, and others. Also, listen for live shuttle audio during all flights.

Our 144.990 Amateur Information Center BBS has topics covering many ham interests. You may access the BBS directly or via digipeaters CRA or CRA-1.

Several of the CRA's repeaters have autopatch capabilities. Ask any CRA member to dial a local or emergency number for you.

The CRA repeaters cover 275 miles along Interstate 25 and 100 miles along Interstate 70 including Denver, Colorado Springs, Boulder, Longmont, Greeley, Fort Collins and Cheyenne.

73 - THE CRA HOPES YOU SAFELY ENJOY COLORADO

GREETINGS FROM LIMARC THE LONG ISLAND MOBILE AMATEUR RADIO CLUB, INC.

Celebrating our 29th Year

LIMARC is an ARRL Affiliated Radio Club, and a Special Service Club, a member of AMSAT, the Tri-State Amateur Repeater Council, and the Hudson Amateur Radio Council. Membership is over 525.

We are a not-for-profit organization, dedicated to the advancement of Amateur Radio, community public service and assistance to fellow Hams in need.

LIMARC sponsors many services including the following Repeater Stations:

W2VL	146.850	4Z - PL
WB2NHO	147.375	4Z - PL
WB2NHO	224.820	4Z - PL
WB2NHO	449.125	4Z - PL
W2VL	1288.000	4Z - PL

- AUTOPATCH
- The LIMARC Memorial Fund
- Monthly license testing (VE). Held at the NY Institute of Technology 2nd Saturday 9am. Call 516-663-6449, W2QZ
- Hamfests in February, May and September.
Call 516-462-5549 - WE2V.
- Swap and Shop Net - Weekly on W2VL 8pm - Thursday.
Call 516-293-7808 - WB2CUK.
- TECH NET - Weekly - W2VL - Sunday 8pm - K2RIW
- MONTHLY MEETING - First Tuesday - H.B. Thompson Middle School, Syosset 8pm. Talk-in on 146.85.
- INFO NET - Weekly - Monday 8:30pm - NK2T
- ARES NET - Weekly - Wednesday 8:30pm - 146.805 - WA2WKV
- MEMBERSHIP - Richard Bressler, KC2TT, 516-546-9362
- OFFICERS: President. WF2Q; V.P. N2FP; Secretary WB2KWC; Treasurer. WA2LUL. Past President KA2YMR
- DIRECTORS: KA2OVR, KF2ER, K2YEW, N2JIX, N2LPD, N2LSK
- REPEATER TRUSTEES: W2VL - WA2WKV; WB2NHO - WB2WAK.

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for the use of cross band repeaters. Cross band repeaters or duplex radios should:

- 1) Never be used to link to an established repeater system or to link established repeaters together without the express approval of the repeater owners.
- 2) Be used for temporary, short duration activities only and never installed as a long term communication facility.
- 3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output on unity gain antenna.
- 4) Utilize CTCSS decode and encode circuitry to minimize uninvited access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.
- 5) Be identified every 10 minutes in accordance with FCC rules.
- 6) Be disabled by its operator within 15 minutes of notification of interference or other problems.
- 7) Should be continually monitored by the operator to minimize interference.

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for the use of cross band repeaters. Cross band repeaters or duplexradios should:

1) Never be used to link to an established repeater system or to link two established repeaters together without the express approval of the repeater owners.

2) Be used for temporary, short duration activities only and never installed as a long term communication facility.

3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output on a unity gain antenna.

4) Utilize CTCSS decode and encode circuitry to minimize uninvited access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.

5) Be identified every 10 minutes in accordance with FCC rules.

6) Be disabled by its operator within 15 minutes of notification of interference or other problems.

7) Should be continually monitored by the operator to minimize interference.

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for use of cross band repeaters. Cross band repeaters or duplex radios should:

1) Never be used to link to an established repeater system or to link established repeaters together without the express approval of the repeater owners.

2) Be used for temporary, short duration activities only and never installed as a long term communication facility.

3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output on unity gain antenna.

4) Utilize CTCSS decode and encode circuitry to minimize uninvited access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.

5) Be identified every 10 minutes in accordance with FCC rules.

6) Be disabled by its operator within 15 minutes of notification of interference or other problems.

7) Should be continually monitored by the operator to minimize interference.

WASHINGTON

In order to minimize inappropriate use of recognized simplex and repeater frequencies, the WWARA has established a set of policies for the use of cross band repeaters. Cross band repeaters or duplexradios should:

- 1) Never be used to link to an established repeater system or to link two established repeaters together without the express approval of the repeater owners.
- 2) Be used for temporary, short duration activities only and never installed as a long term communication facility.

WASHINGTON-QUEBEC

Location	Output	Input	Call	Notes	Sponsor
3) Utilize the minimum power necessary to accomplish the desired communications. A transmitter placed in the vicinity of the operator should use a non-radiation load or be configured for minimum power output in a unity gain antenna.					
4) Utilize CTCSS decode and encode circuitry to minimize unwanted access and unnecessary frequency congestion. Care should always be exercised to use a unique CTCSS tone.					
5) Be identified every 10 minutes in accordance with FCC rules.					
6) Be disabled by its operator within 15 minutes of notification of interference or other problems.					
7) Should be continually monitored by the operator to minimize interference.

Special Service Clubs (SSC)

The following Amateur Radio Clubs have qualified for Special Service Club status by demonstrating an extra commitment to the advancement of Amateur Radio in their communities. Many SSCs also sponsor repeaters that you'll find listed in this directory. Should you find yourself in these areas, whether a permanent resident or just passing through, feel free to contact the Special Service Club and become a part of this vital component of the ARRL organization. The following is a listing of SSCs effective January 1994:

USER NOTE: SSCs listed here follow the following format:

Club Name
Club mailing address
Number of members
Meeting location
Meeting time
Meeting day/frequency

INVITATION TO MEMBERSHIP

JOIN TODAY! Take advantage of these membership benefits: **QST** The interesting, lively way to keep on top of everything that is happening in Amateur Radio: Coverage of regulatory developments; Washington news: operating — DX, VHF-UHF, and repeaters, OSCAR, SSTV, RTTY; lists of hamfests where you can meet local hams, hear interesting talks, and possibly find a bargain at a fleamarket; and you will find technical articles aimed specifically at the beginner's level. **W1AW** is the voice of ARRL. This station transmits daily code practice sessions and regular bulletins. **LOW COST INSURANCE** for your ham gear. **OTHER SERVICES:** Outgoing QSL Bureau, Operating Awards, Amateur Radio Emergency Service, Field Organization and much, much more! The League is a **democratic organization**, of, by and for its members. The members determine policies of the League through the Board of Directors which is elected directly by the membership. The League is **YOU!**

DUES: US: 1 yr. \$30, 2 yrs. \$57, 3 yrs. \$80

Amateurs age 65 or over with proof of age 1 yr. \$24, 2 yrs. \$45, 3 yrs. \$65. **Elsewhere: 1 yr. \$42, 2 yrs. \$81, 3 yrs. \$116.** Immediate relatives living at the same address as a member receiving **QST** may sign up as **FAMILY MEMBERS** at the annual dues rate of \$4.

- REP-200 microcontrolled repeater with autopatch and extensive dtmf control only \$1295 (\$1095 in kit form).
- REP-200T with *real-voice* message record & playback and voice ID only \$1395 (\$1145/kit).
- New REP-200C with voice ID but no autopatch or dtmf control only \$1095 (\$795 in kit form).
- REP-200N for use with external controller only \$995 (\$695 in kit form).
- Individual xmtrs, rcvrs, & controllers for homebrewers. Do your own metalwork & use our rf & control modules; build a repeater starting at only \$460 (\$380 in kit form).

Hamtronics has been providing xmtr & rcvr modules, controllers, and complete repeaters for over 30 years. We sell factory direct, with no dealer markups; so you get top-quality equipment at a reasonable price. And we are small enough to care about customers, giving personal service and lifetime telephone support. Our modular system allows flexibility, so you can have the repeater you want. Cross-band repeaters, low-cost repeaters with voice id, rf links, even repeaters with no controller to use with your ACC or other controller — no problem! See our full-page ad in 73 Magazine for a quick review of all our models and features.

DRC186™

DIGITAL REPEATER CONTROLLER

Before you decide on your next controller
look at our *STANDARD FEATURES.*

The DRC186 Digital Repeater Controller uses REAL SPEECH spoken from a digitally recorded human voice stored in a 1300+ word dictionary. The DRC186 also uses voice prompted commands for ease of use. There is a 60 minute minimum of digital voice storage, for a full function open and private voice mail system which can be independently accessed from the telephone or a radio. The system supports 1000 users, with user maintained passwords, custom autopatch access and hangup codes along with storage for 100 telephone numbers for each user. The DRC186 also supports 6 channels of internal voting for remote receivers, IC-900 and RBI-1 remote bases, all 38 CTCSS tones, as well as VOX. There is a very comprehensive logging system so you can keep track of all autopatch numbers called, start and stop times, and who originated the call. The system executes events based on chronological time, or from users entering command strings either from the telephone or radio. Additional standard features include: Digital squelch control, DTMF control, TOLL and NON-TOLL restrictions, telephone number restriction, call progress detection, last number redial by user, site alarms and much more. Software updates are free from our BBS. We also offer a full one year warranty, schematics and a 750+ page manual.

COMPATIBLE PC, LAPTOP, OR NOTEBOOK!

Section of NOAA 11 APT Image of Northeast US - Unretouched Photo from SVGA Display

MultiFAX offers two fully featured weather satellite demodulators. One version plugs directly into the expansion slot of your desktop PC—the other model interfaces to your PC (laptop, notebook, or desktop) through the parallel (printer) port. Perfect for "crowded" computers or IBM Microchannel PS/2s.

Both versions offer the same powerful capabilities - PLL circuitry for perfectly straight edges on NOAA and GOES satellites. No more complicated timing constants to obtain straight and vertical pictures. Capture ALL the resolution the NOAA satellites can provide (2-3 miles) with a full 12 minute pass.

MFMAP Version 6 Software Features: NOAA, Meteor, GOES, Meteosat and HF Fax ■ Direct Write to Disk (Extended or Expanded memory NOT Required but Can be Used) ■ "Point & Shoot" User Interface with Full Mouse Support ■ PLL Sampling (Images have Straight Edges - Even from NOAA and GOES Audio Tape Recordings) ■ 256 Colors/64 Shades of Gray with SVGA ■ AutoStart and "Show" Record Modes ■ Animate Your GOES and Meteosat Images ■ Zoom to 800% ■ 1024x768 Pixel Resolution with Supported SVGA Cards ■ VESA Video Card Support ■ Powerful Image Enhancement ■ 10 User Definable Enhancement Palettes ■ Easy to Use False Colorization ■ "3D" Enhancement ■ Multiple Unattended Timer Recordings ■ Visible and IR Pictures Recorded Simultaneously ■ Calibrated IR Temperature Readout ■ Dot Matrix and Laser Printer Support ■ On-Screen Level Meter Provide Perfect "Exposure" Every Time ■ GIF Image File Support ■ Latitude/Longitude and Map Overlays (US Included) ■ Shell to DOS from MFMAP6 ■ Reference Audio Tape of Actual NOAA, Meteosat, and HF FAX Transmissions ■ "Split & Join Picture File Utility" ■ Clear, Complete User's Manual (Over 80 Pages)

Amateur Radio Products

Professional Products for the Amateur Market

Model: SD445 - 4 and SD1270 - 4

Introducing two new duplexers specifically designed for the amateur radio market.

High isolation with very low insertion loss are standard features on both the 70 cm quarter-wave duplexer, and the 23 cm three-quarter-wave duplexer.

If large size is a concern for your repeater, this is the duplexer you should buy.

Model	SD445-4	SD1270-4
Frequency Separation	MHz 5.0	6.0 / 12.0 / 20.0
Operating Frequency	MHz 440-450	1240-1300
Insertion Loss	dB typ. 0.5	0.6 / 0.5 / 0.5
Isolation	dB typ. 80	70 / 80 / 85
VSWR	typ. 1.2:1	
Power Handling	Watts 100	
Connectors	50 Ohm type N-Female	
Weight	lb (kg) 6.08 (2.75)	
Depth	in (mm) 12.0 (304.8)	
Width	in (mm) 8.5 (215.9)	
Height	in (mm) 2.5 (63.5)	
Operating Temperature	°C (°F) -40 to +60 (-40 to +140)

Receiver Voter

4 channel, signal-to-noise

Improve coverage by adding receivers.

- Expandable to 32 channels by adding additional cards
- Continuous voting
- Available as a card or in a rack system
- Can be used with RF links or Telco lines
- Select/disable switches available for manual override
- External disable inputs
- LED indicators of COR and voted signals
- Remote voted indicators pinned out
- Thousands in service
- Starting at \$370

Remote Base Interface

Add a Kenwood frequency agile remote base, now to 9 different repeater controllers.

- Connects and controls a maximum of 4 radios or bands
- Supports 16 Kenwood models
- Connects thru the radio's mike jack
- Controls frequency, power, RF power, CTCSS, Shift, etc.
- Expands user function output
- Just plug, program, and play
- \$275
